

## Managed Threat Response Services

### Your Strongest Protection Against Malware

If you don't think you'll ever be the victim of a malware attack, you're kidding yourself. As the volume, variety, and sophistication of cybersecurity threats increase, businesses are finding they don't have the time, capability, or strength to keep up, much less get ahead of attacks. It only takes one breach to ruin your business and reputation, and one ransomware attack to bleed your business dry.

Managed Threat Response Services provide you with proactive defense intelligence and insight of advanced threats to strengthen your overall security posture and reduce the opportunity of you becoming another statistic. Threat management includes discovering attacks that have bypasses your other protection (firewall), validating the threat, and providing actionable containment and remediation advice.

### iTBlueprint Managed Threat Response Services

Blocking attacks from getting on your network is two-fold. It takes the proper threat protection to stop anything that slips through your firewall and the know-how to notice threats before they become full-blown attacks.

iTBlueprint Managed Threat Response Services includes both antivirus protection and malware blocker, as well training to ensure your employees—the weakest link in your security chain—know what to look for and what to do when they notice a threat.

### Senior Security Technicians

Our team of senior security technicians are not only well-versed in detecting all forms of malware attacks, they also will quickly, efficiently, and decisively draft an immediate plan of attack.

### Certified Sophos Specialists

We are fully trained and certified Sophos Intercept X specialists—the best-in-class malware detection and exploit protection agent—managing Sophos' unified console, which enables you to proactively protect your company's sensitive data from one central location.

### Malware Expertise

More Tier 1 enterprise clients call us when they have a malware attack than any other service provider. We have extensive experience to responding to all forms of malware:

- Trojans
- Hybrid malware
- Ransomware
- Spyware
- Bots
- And more

### Employee Education

The weakest link in your defenses is your employees. We provide training for you and your team in what to look for to stop attacks before they get to your network.

### Enterprise Protection

Our services provide you with experienced, IT services without the staff overhead and training expenses, as well as enable you to reduce operational costs and conserve capital budget.

### Augment In-house Staff

We can supplement your internal staff and provide you with certified IT services delivered by a team of experienced IT professionals—allowing your team to focus on revenue-generating activities and innovation, instead of mundane IT tasks.
