

## iTBlueprint Managed Data Protection Services

### Empowering Dynamic Business

As your business grows, the data you have to store and manage grows exponentially, meaning constantly adding more storage just to keep up which can be costly. And managing data backup and recovery in-house can become increasingly expensive and inefficient as well.

### iTBlueprint Managed Data Protection Services

iTBlueprint takes the hassle of managing your storage and puts it in the hands of our experienced team who will help you align your processes, people, and technology with your security, compliance, and risk tolerance goals, to strengthen your business from core to cloud. For almost two decades, we've helped our customers find the best storage fit for their businesses' needs and provided them with managed storage services that enable them to enhance productivity, expand efficiency, and realize success. Our foundation is firmly rooted in providing our customers with the data protection solutions they can count on now, and scale with them as they grow.

#### Backup as a Service (BaaS)

iTBlueprint can manage and monitor your cloud backup, using best practices that we've learned to make your backup more efficient, reliable, and cost effective.

#### Customized Storage

On-premises and cloud-based solutions to fit your business's unique daily operations, as well as provide redundancies to ensure business stability.

#### Disaster Recovery Planning

Our team works within your requirements and compliance regulations to ensure faster response times, increase your flexibility, and preserve your reputation.

#### Data Recovery Expertise

Backed by a wealth of knowledge in storage, backup, network and security, our team has your back when it comes to recovering quickly so your business doesn't skip a beat.

#### Dynamic Data Protection

We manage and monitor your cloud backup to increase its efficiency, reliability, and cost effectiveness.
